EP INFRA-NETWORKS LTD

Compliance & Investor Relations Report

Focus Area:

Jurisdiction: France (Corporate) / Nigeria (Operations)

Trust & Transparency: The Paris-Lagos Governance Model

1. DUAL-JURISDICTIONAL SECURITY

EP INFRA-NETWORKS operates under a sophisticated legal structure designed to eliminate "Emerging Market Risk" for our partners:

- **Governance Seat:** Paris, France. Our primary corporate actions, treasury management, and high-level board decisions are governed by French Commercial Law.
- **Operational Seat:** Lagos, Nigeria. Our local entity handles execution, logistics, and on-ground engineering.
- **Benefit:** Investors enjoy the protection of European legal standards while capturing the massive growth of African infrastructure.

2. THE ESG MANDATE (Environmental, Social, Governance)

We don't just build; we build responsibly. Our framework is aligned with the United Nations Sustainable Development Goals (SDGs):

- **Environmental:** Transitioning heavy logistics from road to solar-augmented rail.
- **Social:** Creating "Digital Inclusion" for 50M+ people by bringing fiber to underserved Northern and Eastern corridors.
- **Governance:** Strict adherence to anti-corruption protocols, international auditing standards, and quarterly transparent reporting to all shareholders.

3. CAPITAL PROTECTION & CURRENCY SHIELDING

To manage volatility, we employ a "Hard-Asset Strategy":

- Our revenue is tied to essential services (Data and Logistics) that remain in demand regardless of economic cycles.
- We prioritize contracts with international partners and Tier-1 telcos, ensuring a high-quality, reliable revenue stream.

4. AUDIT & OVERSIGHT

We commit to annual audits by "Big Four" or equivalent international firms. Every Euro and Naira invested is tracked through a transparent project-finance model, ensuring funds are deployed exactly where they are promised.
